Host-Pathogen Interaction:

# The Role of Innate Immunity

Friday, June 15th, 2007

Inselspital Bern, Auditorium Ettore Rossi (Kinderklinik), Freiburgstr. 15, 3010 Bern

09.00	Opening remarks	<i>Organisers</i>
09.05	Viral induction and suppression of the interferon system	<i>Friedemann Weber, Freiburg</i>
09.45	Mutual control of the host cell's antiviral response and Hepatitis C virus replication	<i>Volker Lohmann, Heidelberg</i>
10.25	<i>Coffee break</i>	
10.50	The two faces of type I interferons in bacterial infection	<i>Silvia Stockinger, Wien</i>
11.30	The inflammasome: A danger sensing complex involved in autoinflammatory diseases	<i>Catherine Dostert, Lausanne</i>
12.10	<b>Poster viewing and lunch (complimentary)</b>	
14.10	Basal and inducible immune responses in the mosquitoes	<i>Elena Levashina, Strasbourg</i>
14.50	TB or not TB: Checkpoints of host-pathogen interaction in mycobacterial infections	<i>Steffen Stenger, Ulm</i>
15.30	<i>Coffee break</i>	
15.55	Cellular mechanisms for resistance to HIV-1 infection	<i>Jeremy Luban, Bellinzona</i>
16.35	Intracellular inhibitors of innate immunity from vaccinia virus	<i>Geoffrey Smith, London</i>
17.15	Closing remarks	<i>Organisers</i>
17.20	End of meeting	

Sponsored by the Nachwuchsförderungs-Projekt-Pool, the Beer-Brawand Foundation and the Guillebeau-Fonds.

**Please submit abstracts for posters and/or register as participant until May 31st, 2007 at [innate-immunity@gmx.net](mailto:innate-immunity@gmx.net)**
